Re: Moraine Recycling Inc.
1975 Springboro Road
Miamisburg, Ohio

Dear Mr. Grillot:

C Pursuant to Mr. Durkhart's and my visit on Friday, October 16, 1970, we are writing this letter to inform you that our preliminary inspection of the Air Curtain Destructor indicated that it may, indeed, conform to the criteria of the Air Pollution Control Regulations. As soon as the electrical connections are completed and the final adjustments are made, we would be pleased to join you for your first trial run.

O At this time, the Ohio Department of Health is still processing your application to operate a Solid Waste Disposal Facility on this site. Since you have nearly completed the air curtain and since we have received your application and check for a Solid Waste Disposal Facility, we recommend you start the air curtain destructor as soon as possible for an experimental shake down. During this several week period, your operation will be covered by open burning permits issued by our Air Pollution Bureau. If you have not already done so, we recommend that you make application for an open burning permit from Mr. William Auberle, Supervisor, Air Pollution Control Bureau, 6175 West Third Street, Dayton, Ohio.

As soon as you get into operation, several representatives of the Ohio Department of Health wish to evaluate your air curtain destructor.

Y Please call us if you have any questions.

Very truly yours,

ROBERT A. VOGEL, M.D.,
Health Commissioner

EPA Region 5 Records Ctr.

255573
